

**PKD**

# Foundation Australia

**P**olycystic **K**idney **D**isease accounts for 1 in 10 people on dialysis and 1 in 8 kidney transplants in Australia. Right now, about 2000 people in Australia and New Zealand are living with kidney failure due to PKD. The estimated cost to the community is >\$80 million per year.

**PKD** accounts for 6% of all people diagnosed with kidney failure and affects people regardless of sex, age, race or ethnic origin.

We are the only Australian organisation dedicated to finding a cure.

**PKD Australia** was established to:

Fund medical research to find a cure for **PKD**

Connect and support Australians and their families affected by **PKD**

Provide education and information to people impacted by **PKD**

Connect with us at:
