

VMC Process 2019

12mth f/u

1. At 12mths pathology reviewed by CNC and entered onto access and excel spreadsheet, email sent to nephrologist outlining results, letter sent to GP and patient. If stable continue VMC for another 12mths.
2. If patient has a 2year KFRE>20% or a decrease of eGFR by more than 25% or 15ml/min then refer back to nephrologist for further patient management plan.
3. Nephrologist will be notified about yearly results and Kidney Failure Risk Equation (KFRE) Scores

If patient has 5year KFRE <3% and stable eGFR for 2 consecutive years on VMC then we will discharge back to GP and notify you of the discharge plan.

Missed Pathology

1. Patient will be sent a pathology form (bicarb, urea, creat, eGFR, albumin, Ca, PO4, Hb and urine ACR) along with a letter. GP will also be sent a letter and nephrologist notified. Pathology will be followed up in 2 weeks from date letter sent.
2. If patient still has no pathology nephrologist notified for further management plan.
